

# Enrich your view with high-fidelity intelligence

## The problem

Analysts are drowning in alerts from generic feeds that create **more noise than clarity**. Without **high-fidelity insight**, SOCs stay stuck in reactive mode. You need threat intelligence **that cuts the noise** and reveals real, emerging threats.

**750,000**

suspicious samples received every day

**500,000**

unique URLs daily blocked

**2,500,000,000**

URLs analyzed every day

**60,000,000**

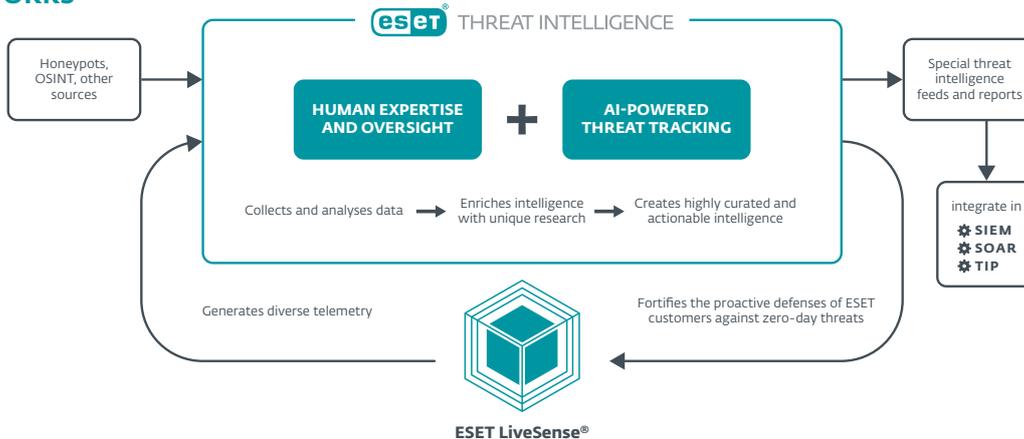

metadata records processed every day

## The solution

### ESET THREAT INTELLIGENCE FEEDS

ESET Threat Intelligence Feeds are built to give your team **clarity** – not just more data. Backed by **global telemetry** and **expert analysis**, they deliver timely, high-confidence intelligence that helps you reduce dwell time, strengthen detection and anticipate targeted threats.

### HOW IT WORKS

### KEY BENEFITS

#### Improve posture with high-confidence IoCs

ESET delivers rigorously curated indicators that cut noise and sharpen detection across your security stack.

#### Respond faster with actionable intel

Focused feeds give your SOC only relevant, high-value intelligence, streamlining triage and speeding up investigations.

#### Gain visibility others miss

ESET's global telemetry and regional expertise uncover threats and infrastructure other vendors overlook, helping you anticipate emerging risks.

### AVAILABLE DATA FEEDS

- Malicious files
- Botnet feed
- APT feed
- Android infostealer feed
- Android threats feed
- Malicious email attachments
- Ransomware feed
- Domain feed
- URL feed
- IP feed
- Cryptoscam feed
- Phishing URL feed
- Scam URL feed
- Smishing feed
- SMS scam feed
- eCrime feed
- Potentially Unwanted Applications: Dual-use app files
- Potentially Unwanted Applications: Adware files

### EASY INTEGRATION INTO YOUR EXISTING TOOLS

Enrich your **TIP, SIEM or SOAR** with ESET telemetry using standardized formats such as **JSON and STIX/TAXII**. Full API access and documentation are included to help your team get value fast.
