

PROTECT

PLUGIN FOR CONNECTWISE ASIO

For Managed Service Providers (MSPs), protecting client environments isn't just a priority; it's a core responsibility. That's why having smooth, reliable integration between security and service platforms is essential.

With the **ESET PROTECT plugin for ConnectWise Asio**, MSPs gain real-time visibility and control over endpoint protection directly within their existing workflows. This integration equips them to respond faster, manage more efficiently, and provide superior security to their customers—all from a single, unified dashboard.

It's one more way that ESET helps you stay ahead of threats while building deeper trust with every client you serve.

CAPABILITIES

The plugin provides three main functionalities.

ONE-CLICK DEPLOYMENT

Deploys ESET Security products to secure endpoints, and can also install, reinstall and uninstall ESET endpoint software.

TASK AUTOMATION

Allows you to easily perform tasks on endpoints. Includes **Activation** and **Deactivation, Running Remote Scans, and Updates**.

MONITORING

Track the health and status of ESET endpoints in real time, automate tasks, or click through to ESET PROTECT for deeper analysis.

SYSTEM REQUIREMENTS

Supported ESET Business Products

- ✓ ESET Endpoint Antivirus for Windows
- ✓ ESET Endpoint Security for Windows
- ✓ ESET Server Security for Microsoft Windows Server
- ✓ ESET Inspect Connector
- ✓ ESET Full Disk Encryption

For the complete list of supported ESET products visit help.eset.com.

ConnectWise Asio

Formerly known as "Continuum RMM". To review system requirements, please visit [ConnectWise Asio's website](https://connectwise.com).

HOW TO AUTOMATE

These are examples of how you can use the plugin components to your advantage to automate the management of endpoint security, and save time creating and resolving tickets.

1. SET-AND-FORGET DEPLOYMENT

Situation: When onboarding a new customer or maintaining an existing customer, you want to ensure that ESET is deployed to their endpoints.

How to automate: In ConnectWise Asio, you create a Policy and a Package, then assign them to a customer, site, or group. This setup takes care of automatic deployment.

2. ENSURE DETECTION DEFINITIONS UPDATES

Situation: While ESET antimalware has a default update task running, you can set up an additional remote update in case the default one fails.

How to automate: To achieve this, create a ConnectWise Asio Task that runs the ESET plugin script with the "update" parameter once every day.

BENEFITS

FAST DEPLOYMENT

Start protecting endpoints in minutes thanks to the streamlined setup process.

QUICK LEARNING CURVE

The integration works within the familiar ConnectWise Asio environment, eliminating the need for additional training.

LEVERAGE THE ESET CONSOLE

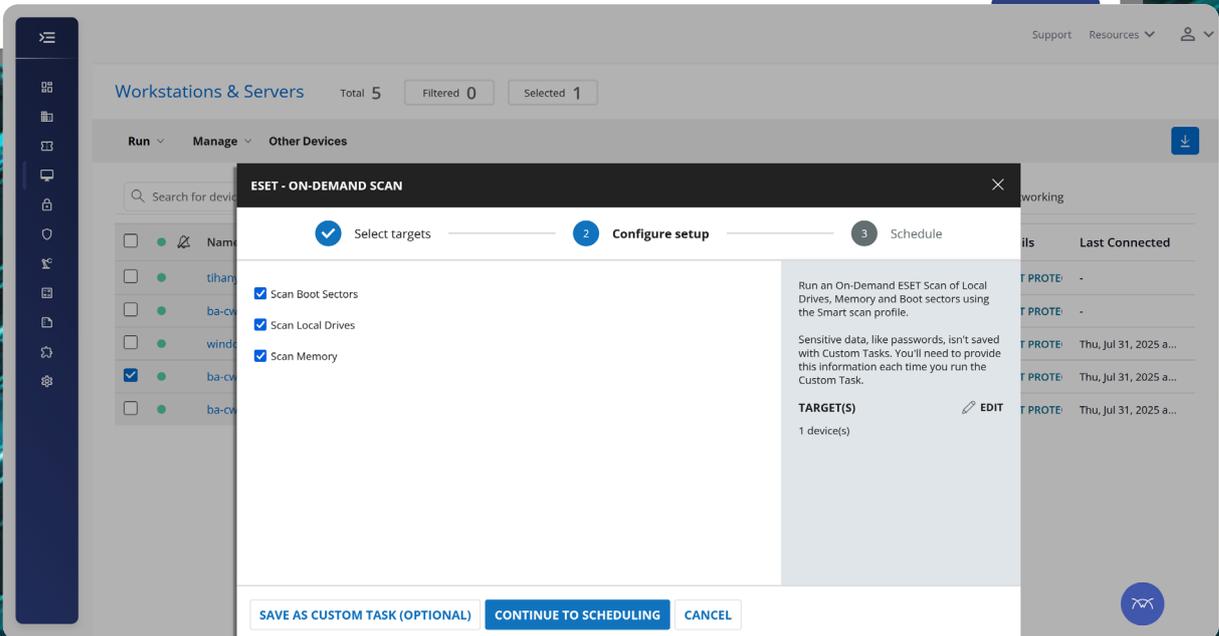

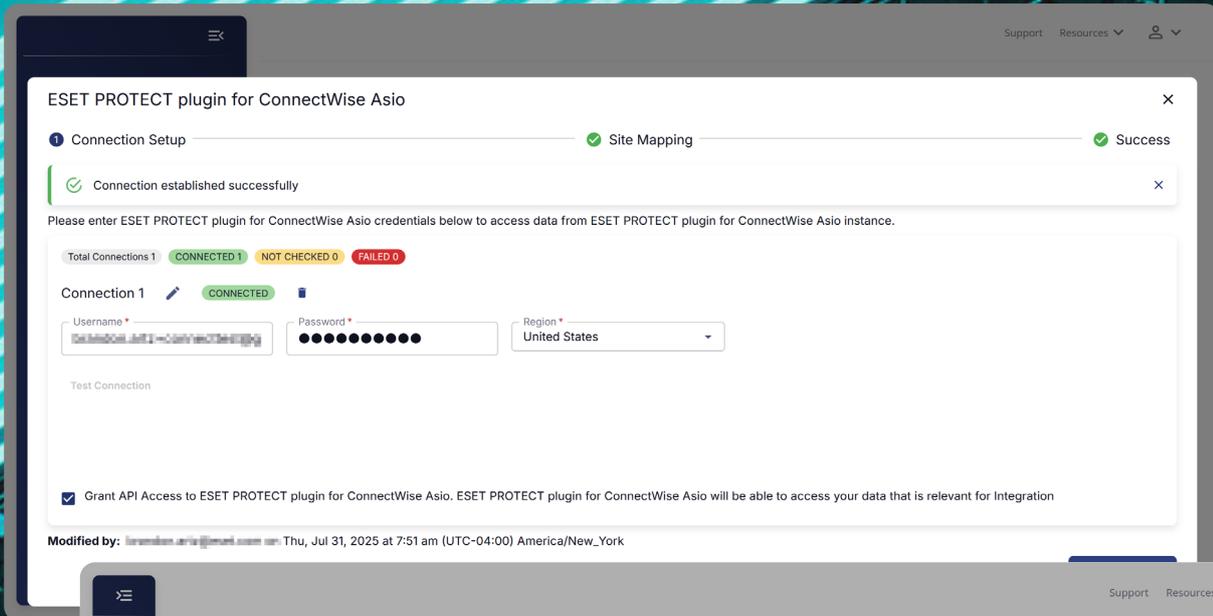

Handle routine tasks directly within ConnectWise Asio, and if you need deeper insights or actions, easily switch to ESET PROTECT.

SAVE TIME AND MONEY

The plugin's capabilities combined with ESET's trademark detection and extremely low support burden give you an unparalleled profit-per-seat ratio.

RELY ON PROVEN PROTECTION

Backed by decades of security expertise, ESET's unparalleled multilayered protection takes a proactive approach to threats, helping you keep clients secure at all times.
