

OVERVIEW

ENCRYPTION SOLUTIONS

Data protection for businesses of all sizes

Progress. Protected.

Encrypting data on your endpoints can help you comply with data protection regulations

SATISFY LEGAL DATA PROTECTION REGULATIONS

By securely encrypting the personal data records you hold, your business or organization can better protect itself in the event of a system breach. That's because such incidents are much less likely to be considered a compliance failure by regulatory authorities if data is properly encrypted.

MONITOR ENCRYPTION ON USER MACHINES REMOTELY

Remote management simplifies admin duties and saves time. Go beyond management of security products and manage ESET Full Disk Encryption using the ESET PROTECT console. ESET PROTECT can be installed on-premises or run as a cloud console.

PROTECT DATA WITH A SIMPLE YET POWERFUL SOLUTION

With ESET encryption solutions you can safely encrypt hard drives, removable media, individual files and email, using the industry-recognized FIPS 140-2 validated 256 bit AES encryption standard for assured security. All with minimum interaction on the user side.

ESET FULL DISK ENCRYPTION AND ESET ENDPOINT ENCRYPTION USE PATENTED TECHNOLOGY TO PROTECT DATA FOR BUSINESSES OF ALL SIZES

eSet® FULL DISK ENCRYPTION

Manage full disk encryption across your entire network from a cloud or on-premises console—alongside other ESET security products. ESET PROTECT console allows admins to deploy, activate and manage encryption on their connected endpoints with a single click. Full Disk Encryption (FDE) encrypts system disks, partitions and entire drives to ensure that everything stored on each workstation is locked down and secure, protecting you against loss or theft.

eSet® ENDPOINT ENCRYPTION

Provides additional protection. Users can protect individual items like files, folders, removable media and email. With file and email encryption, user data is protected when data is in transit, allowing secure collaboration. You can also manage remote devices via a proxy, eliminating the need for risky incoming connections and making management of encryption safe and simple for businesses of all sizes.

Which ESET encryption solution is best for you?

WHEN TO USE ESET FULL DISK ENCRYPTION

All products managed from one console. IT admins deal with remote management on a daily basis. ESET Full Disk Encryption works within the ESET PROTECT console, helping administrators to save time thanks to familiarity with the existing management environment and concepts.

The essential encryption solution to achieve legal compliance. ESET Full Disk Encryption not only protects your company from data loss but also helps it comply with data protection regulations such as GDPR. This solution offers a simple and straightforward way to remotely encrypt data at rest on each end-user's device.

Cross-platform coverage. Manage encryption on Windows machines and native macOS encryption (FileVault) from a single dashboard.

WHEN TO USE ESET ENDPOINT ENCRYPTION

Granular data protection. All companies have sensitive data such as customer lists, proprietary information and sales-related data. ESET Endpoint Encryption gives companies enhanced ability to protect specific **files, folders, virtual disks or archives**. Ideal for organizations with a shared devices policy and advanced encryption requirements.

Protect data in transit. ESET Endpoint Encryption goes beyond protecting data stored on company machines. By encrypting emails and attachments and restricting access to removable media for specific users, it can also **protect data in transit** and prevent leaks outside the company network.

FEATURES

- ✓ Full disk encryption
- ✓ Manage encryption on Windows
- ✓ Manage encryption on macOS
- ✓ Removable media encryption
- ✓ File and folder encryption
- ✓ Outlook plugin for email and attachments
- ✓ Virtual disks and encrypted archives
- ✓ Licensing
- ✓ Purchase options
- ✓ Available via MSP monthly licensing

About ESET

Next-gen digital security for business

WE DON'T JUST STOP BREACHES—WE PREVENT THEM

Unlike conventional solutions that focus on reacting to threats after they've been executed, ESET offers an unmatched AI-powered prevention-first approach backed by human expertise, renowned global Threat Intelligence, and an extensive R&D network led by industry-acclaimed researchers—all for the continuous innovation of our multilayered security technology.

Experience unparalleled protection from ransomware, phishing, zero-day threats and targeted attacks with our award-winning, cloud-first XDR cybersecurity platform that combines next-gen prevention, detection, and proactive threat hunting capabilities. Our highly customizable solutions include hyperlocal support. They offer minimal impact on endpoint performance, identify and neutralize emerging threats before they can be executed, ensure business continuity, and reduce the cost of implementation and management.

In a world where technology enables progress, protect your business with ESET.

RECOGNITION

ESET received the Business Security APPROVED award from AV - Comparatives in the Business Security Test in July 2023.

ESET consistently achieves top rankings on the global G2 user review platform and its solutions are appreciated by customers worldwide.

ESET has been recognized as a 'Top Player' for the fourth year in a row in Radicati's 2023 Advanced Persistent Threat Market Quadrant.
