

Digital Security
Progress. Protected.

**Powerful
protection, small
business savvy**

WHEN TECHNOLOGY ENABLES PROGRESS, ESET® IS HERE TO PROTECT IT.

ESET is a global digital security company whose award-winning technology secures over one billion internet users and hundreds of thousands of businesses. We offer state-of-the-art privacy, identity, device and smart home protection.

Our technology marries artificial intelligence, human expertise, multilayered security technology, and live cloud protection for proactive defense against modern cyber threats, including fraud and AI-driven scams. It is prevention-forward, easy to manage, and light on resources—all to enhance business continuity and efficiency.

Our offering is available across all major operating systems and is anchored in three pillars of protection:

- **Smart scam and threat protection:** defending entrepreneurs and businesses against a wide range of digital threats, with a special emphasis on identifying and blocking scams. This includes protection from malware, phishing, and fraudulent online activities, as well as securing online transactions, networks, routers, and more.

- **Privacy and data protection:** helping users take control of their work and personal data with tools designed for secure and private digital experiences. This includes unlimited VPN access, robust data encryption, and ransomware defense and recovery tools.

- **Smart office and smart home protection:** securing everything from PCs, laptops and smartphones to smart TVs and IoT devices.

ESET houses 11 Research & Development centers worldwide and brings over 30 years of technology-driven innovation to the digital security industry. We operate in 178 countries and offer strong local support.

In a world where technology enables progress, choose ESET for your business.

AV-Comparatives 2024 Product of the Year

After a year-long, independent lab test of 16 Windows security suites, ESET HOME Security Essential was named AV-Comparatives' 2024 Product of the Year, earning Advanced+ in all seven categories—from real-world threat blocking to ultra-light performance—proof of seamless, uncompromising protection that never slows devices.

Like all AV-Comparatives' public test reports, the 2024 Summary Report is available for free [here](#).

ESET HOME: ONE PLATFORM, COMPLETE SECURITY MANAGEMENT

ESET HOME is a user-friendly platform that allows you to activate and renew your subscriptions, add and protect new devices, and more. Share your subscription with family and colleagues, and effortlessly keep track of each member's security and devices. Enable powerful features like Safe Server, VPN, and more. ESET HOME is available via web portal or mobile app.

FEATURES & BENEFITS:

What can you do with the ESET HOME platform?

Review your security status

Receive detailed information about the security of all devices connected to your account—issues, updates, reports and more.

Download, update and renew

Use your account to download protection that is automatically activated and easy to navigate. Monitor, customize, and renew your subscription as needed.

Stay secure with Anti-Theft

Protect your device in case of loss or theft. The Anti-Theft functionality allows you to easily lock, track and locate devices, preventing unwanted access to your data and safeguarding your privacy.

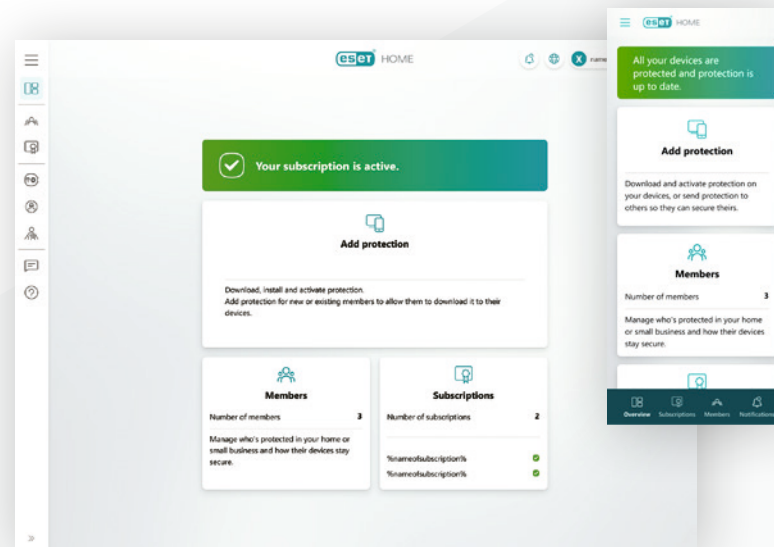

Monitor your protection with a crystal-clear view

ESET HOME is designed around the people you protect. Seamlessly assign devices and track VPN access. See exactly who and what is protected—clearly organized by person and device.

Benefit from Safe Server, VPN, and much more

Use ESET HOME to enable powerful security features. Safe Server protects the valuable data on your company servers, and unlimited VPN secures your connection in public and private spaces—excellent for remote work. With ESET HOME, there's much to discover.

All this and more—visit www.eset.com for more information.

ESET SMALL BUSINESS SECURITY

ESET Small Business Security offers seamless and easy-to-use protection for the small business. Use it to safeguard online transactions, lock and locate devices, block ransomware and restore affected files, and shield servers. Encrypt sensitive data, and avoid phishing scams. Stay secure and anonymous with Anti-Theft, Safe Browsing, and unlimited VPN security. This solution protects both work and personal devices. It is reliable, cost-effective, and light on resources.

KEY FEATURES

How do you benefit?

Safe Banking – This functionality offers automatic protection when banking and completing transactions online. Communication between the keyboard and browser is also encrypted to protect against keyloggers.

Safe Browsing – Safeguard your company's online activities with a secured browser mode. This functionality offers an additional layer of browsing protection, defending against malware, keylogging and other types of digital threats. It is automatically activated for all compatible browsers.

Browser Privacy & Security – A browser extension for elevated security and privacy. Easily distinguish between safe and unsafe search results. Stay protected from phishing websites and other threats. Clear browser data on demand or automatically, reducing digital clutter and optimizing browser efficiency. Use the unique Metadata Cleanup to remove metadata from images uploaded to your browser, or Website Settings Review to effortlessly review and manage website permissions.

Anti-Theft – Optimize your device protection and take action in case it gets lost or stolen. Initiate automatic monitoring of a lost or stolen mobile computer when it comes online, allowing you to view its location and create a custom message for display on its screen. Access the device's camera to observe its surroundings and easily collect and upload screenshots, saved directly to the ESET HOME interface—all to improve your chances at retrieval.

Multilayered Anti-Phishing – With our anti-phishing protection, you can stay safe from scams and fake websites. Guard your browser, social apps, SMS, and links from attempts to steal your sensitive information.

Ransomware Remediation – Prevent attackers from locking your data and demanding payment. While the Ransomware Shield detects and blocks threats, Ransomware Remediation automatically backs up and restores at-risk files.

Safe Server – Servers are the heart of your company's IT infrastructure. This functionality provides essential protection for data passing through all general servers and network file storage servers running on the Windows Server operating system. Its multilayered defense shields you from ransomware and botnets. An excellent way to enhance your business continuity.

Webcam Protection & Microphone Monitor – Get notified whenever there's an attempt to access your webcam or microphone—so you can instantly choose to allow or block it. Simple, smart protection that helps prevent unwanted recording or surveillance.

Network Inspector – Test your router for vulnerabilities, such as weak passwords or out-of-date firmware. This functionality provides an easy-to-access list of connected devices and allows you to scan smart devices for vulnerabilities. Users also receive suggestions for how to resolve security issues.

ESET Folder Guard – Protect valuable data! This functionality ensures that only trusted apps can modify files in protected folders. It blocks untrusted applications from access and notifies you of unauthorized attempts. It is an especially useful defense against ransomware.

Secure Data – Boost your privacy and security with powerful encryption of files and removable media. Prevent data theft during USB or laptop loss, and ensure secure collaboration and data sharing.

VPN – Secure your network connection in public and private spaces. The VPN prevents data theft and unwanted tracking and keeps you and your data safe with an anonymous IP address. With unlimited bandwidth, you'll get unlimited access to online content.

This and much more. Includes additional features to secure your digital life and business.

Seamlessly manage and maximize ESET Small Business Security with ESET HOME—the complete security management platform.

Once installed, always protected.
