

# Community-Based Healthcare Organization

*The main benefit has been in the time saved for our techs, allowing us to respond to other service requests faster and improve first-contact resolution. That's a win for both IT and the clinical staff we support."*

**INDUSTRY**  
Healthcare

**COUNTRY**  
United States

**PRODUCT**  
ESET PROTECT Advanced

## THE CUSTOMER

This community-based healthcare organization supports over 500 doctors, nurses, and staff, all working toward a single mission: delivering high-quality patient care across a connected, modern infrastructure. With a strong reliance on internet connectivity for provider support and strict HIPAA compliance requirements, data privacy and security are non-negotiable priorities.

## THE CHALLENGE

the IT team faced ongoing challenges in keeping endpoints secure and virus definitions current.

Manual processes and decentralized management made it difficult to respond quickly to updates or emerging threats, putting both operational efficiency and compliance at risk.

## KEY BENEFITS

- Streamlined visibility and control over all endpoints from a single console
- Significant time savings and reduced response times
- Simplified virus definition updates
- Ongoing customer support helps identify further efficiencies and optimizations

## THE SOLUTION

After evaluating their options, the team chose ESET PROTECT Advanced to secure more than 1000 endpoints. Seeking a more streamlined management system with simplified updates, the team found ESET to be the perfect fit.

*"The main benefit has been in the time saved for our techs, allowing us to respond to other service requests faster and improve first-contact resolution. That's a win for both IT and the clinical staff we support."*

With modern endpoint protection techniques, mobile threat defense, and full disk encryption, ESET PROTECT Advanced offered the perfect balance of robust security features and centralized, cloud-based management, without adding unnecessary complexity or cost.

*"We recently worked with an ESET system engineer to review and revise our system settings. We implemented new policies that helped streamline our operation even further."*

For this healthcare organization, ESET has delivered a powerful combination of security, efficiency, and control. With ESET's help, the IT team can now ensure compliance, protect patient data, and focus on what matters most: Keeping technology running smoothly so caregivers can focus on patients.
