

US-Based Manufacturing Company

"We were a loyal ESET customer prior to this update. We were happy with ESET, so we did not look at many other vendors."

INDUSTRY
Manufacturing

COUNTRY
United States

PRODUCT
ESET PROTECT Entry

THE CUSTOMER

A US-based manufacturing company specializes in the design and production of power supplies. With a focus on precision engineering and reliable operations, the organization depends on a secure IT environment to protect sensitive designs, streamline workflows, and support day-to-day business functions.

THE CHALLENGE

While already an ESET customer, the company faced common IT security challenges, particularly training users to follow best practices and minimize risks. Like many organizations, they needed a solution that could protect their endpoints effectively while remaining easy for staff to adopt and manage.

KEY BENEFITS

- Multilayered protection that stops advanced threats, including ransomware
- Lightweight performance
- Ease of management with automation that reduces manual IT work
- Seamless upgrade path requires no additional training

THE SOLUTION

When it came time for renewal, the manufacturing company chose to upgrade from ESET PROTECT Essential to ESET PROTECT Entry in order to strengthen their security posture.

"We were a loyal ESET customer prior to this update. We were happy with ESET, so we did not look at many other vendors."

ESET PROTECT Entry delivers modern, multilayered endpoint protection powered by advanced machine learning, all through an easy-to-use management console. With its lightweight footprint and unobtrusive performance, the upgrade provided the team with a low-maintenance solution that required no additional training.

Overall, the company reports a strong partnership and consistent satisfaction

"Being an upgrade it was an easy transition from one product to the next. We are very happy with the decision to stay with ESET."
