ESET PROTECT Essential

THE CUSTOMER

Deer Valley Unified School District spans 367 square miles in Arizona, making it the fifth largest school district in the state. It serves areas including Phoenix, Glendale, Anthem, Peoria, and New River. Currently, the district educates 36,000 students and employs 5,000 staff members. There are 40,000 district-owned devices and over 10,000 Bring Your Own Device (BYOD) devices utilized across its 38 schools.

THE CHALLENGE

Being a school district, Deer Valley has both internal and external threats it has to secure against, as well as state—and federal—mandated compliance directives. Not only was the decision to move to ESET based off extensive testing, Deer Valley re-evaluates its protection every year and has continued to choose ESET over the past eight years.

THE SOLUTION

After making the switch to ESET, Deer Valley has gained valuable time to focus on other projects, thanks to seamless deployment and minimal hands-on attention for updates.

"We were looking for a small footprint on the desktop, easy deployment with centralized management and, most importantly, trusted threat detection and mitigation with reporting."

ESET met these requirements and more. Over the course of an impressive eight-year partnership, any challenges have been swiftly addressed and resolved by ESET's responsive and expert technical support team.

"Outstanding company, superb technical support, provides strong threat protection and central management."

KEY BENEFITS

- Outstanding detection and threat mitigation
- Light system footprint frees up resources
- Single-pane-of-glass solution that protects all platforms including desktop and mobile devices
- Easy deployment and exemplary customer support
