ESET PROTECT Advanced, Security Authentication, Mail Security, Endpoint Encryption Pro

## THE PARTNER

Meriplex is a managed cybersecurity, IT and SD-WAN solutions provider specializing in transformative and customer-centric services for the mid-enterprise market. Using a collaborative approach, the company provides innovative, secure and reliable solutions customized to advance business growth. Meriplex was named to CRN's 2021 Managed Services Provider list, which identifies key players who are setting themselves apart with best-of-breed solutions that provide the business outcomes customers need. In addition, inclusion in the Elite 150 category recognizes Meriplex as a large, data center-focused MSP with a strong mix of on—and off—premises services.

## THE CHALLENGE

At Meriplex, cybersecurity is a crucial part of their comprehensive suite of managed services and cloud-hosted solutions. These offerings include unified communications, disaster recovery, backup as a service, SD-WAN, and network and security operations center services. To uphold their commitment to delivering reliable, top-tier solutions, Meriplex required a security partner capable of providing high performance, ease of management, and dependable support for both their team and customers.

## THE SOLUTION

Meriplex chose ESET as their go-to provider for endpoint security, leveraging their full suite of ESET PROTECT products.

*“ESET provides a great partnership and dedicated support for our business, dependable and reliable products, and ease of management for our team and customers.”*

ESET's high malware detection rates, low false positives, and lightweight footprint make it a standout choice for both performance and reliability.

In addition, ESET's management console streamlines deployment and monitoring for the Meriplex team. Compared to other security Vendors they have used in the past, the Meriplex team ranks ESET among the best, citing not only its robust product line and feature set but also its exceptional support provided by account managers, technical engineers, partner services and marketing teams.

## KEY BENEFITS

- High malware detection rates with low false positives minimizes unnecessary disruptions
- Light system footprint
- Centralized remote administration improves efficiency
- Dependable and reliable products
- Exceptional support
