

6 Minutes vs. Ransomware: Who Wins?

Why Speed and 24/7 Coverage is Critical

Adversaries don't work 9–5.

Most serious incidents escalate after hours, when your team is offline. ESET MDR delivers 24/7 continuous monitoring and rapid response so threats are contained before they become business disasters.

Why 6-Minute MTTR Is Crucial:

- Modern ransomware can move from initial foothold to encryption in minutes, not hours.
- Every extra minute gives attackers time to steal credentials, delete backups, and stage data for exfiltration.
- ESET MDR isolates compromised endpoints in under 6 minutes, stopping lateral movement and privilege escalation before damage spreads.

Why 24/7 Coverage Matters:

- Without continuous monitoring, alerts pile up while attackers exploit off-hours gaps.
- ESET MDR turns detection into real protection, backed by a global SOC team, threat intel, and proven playbooks.
- Reduce breach likelihood and cost with round-the-clock containment.

"ESET MDR gave us peace of mind. Knowing experts are watching 24/7 and can respond in minutes changed everything for our security posture."

— Dexios Corporation

Why You Need ESET MDR

Close cyber security gaps with human-led, 24/7 protection and lightning-fast response.

- ✓ 24/7 Monitoring: Attackers don't keep office hours, neither do we.
- ✓ 6-Minute Response: Stop threats before they spread.
- ✓ Expert SOC Team: Human-led analysis backed by global threat intel.
- ✓ Simplified Security: Eliminate alert fatigue and complexity.
- ✓ Proven Results: Stronger security posture, lower breach risk.

Your 6-minute advantage starts now.

Step Up Your Security

Superior Protection Starts Here

Cyberattacks don't wait. The average time to identify and contain a breach is 241 days—that's **241 days of risk**. With ESET PROTECT Elite + MDR, you get advanced security and expert response to stop threats before they disrupt your business.

Why Upgrade?

- **Vulnerability Scanning & Patch Management:** Stay compliant and secure by closing gaps that attackers exploit.
- **Ransomware Remediation:** Automated rollback and file restoration to keep your business running.
- **Endpoint Detection & Response (EDR):** Delivers comprehensive threat and system visibility, empowering risk managers and incident responders to quickly analyze root causes and respond to threats.
- **Managed Detection & Response (MDR):** 24/7 monitoring with 6-minute MTTR to isolate compromised endpoints fast.
- **Incident Response:** Expert forensic analysis when you need it most.
