Migrate to ESET Cloud in 4 Easy Steps

With the pressure security teams face today from evolving cyber threats to keeping operations running, migrating to the cloud can seem daunting. ESET understands these challenges and offers a streamlined, easy-to-follow process designed to get your workloads migrated and secured, headache-free. Plus with numerous benefits like enhanced security, reduced capital expenditures, and centralized management, there's no better time to get started.

01 CREATE ESET PROTECT CLOUD INSTANCE

Add and activate your ESET PROTECT Cloud license in your ESET Business Account or ESET MSP Administrator portal.

[Set Up Guide](#)

02 SET UP OR MIGRATE REQUIREMENTS

Export and import the policies, groups, reports, and structures that you wish to migrate. You may also set up from scratch.

03 MIGRATE DEVICES

Send migration instructions to your devices and transfer them in minutes with the downloadable migration policy.

04 SET UP ESET PROTECT USERS

Add your users to the ESET PROTECT Web Console.

Why Switch to Cloud?

Centralized Management

Easily monitor and manage security measures across sites, departments or even countries from anywhere with real-time threat detection and response.

Business Continuity and Disaster Recovery

Built-in recovery tools ensure uninterrupted operations and fast recovery.

Enhanced Security

Your ESET PROTECT console sits behind the ESET cloud infrastructure so you benefit from advanced threat detection and around-the-clock monitoring.

Lower Total Cost of Ownership

Eliminate costly on-prem resources and reduce capital expenditures.

Increased Scalability

Easily adjust your security infrastructure to your evolving needs.

Fast Deployment and Updates

Up and running in minutes with continual updates and seamless vulnerability and patch management updates.

ESET Makes Migration Easy

Take your time

Your ESET cloud license is valid for both on-premises and cloud environments, allowing you to keep both servers running simultaneously at no additional cost for as long as needed. You can decommission your on-premises server whenever you choose.

Local support

Our support teams are here to help with the steps that you get stuck on in your language. Premium Support is also available 24/7/365 for immediate, always available help.
