

Turn intelligence into foresight

The problem

Organizations often struggle with **visibility into sophisticated, targeted attacks**, especially in today's turbulent geopolitical landscape. APTs (Advanced Persistent Threats) are stealthy, well-funded and often tailored to specific regions. Without contextual intelligence, SOC teams lack the capabilities to detect, prevent and fully understand these threats, leaving organizations **vulnerable to long-term compromise**.

70+

expert reports per year

~330

pages of expert APT reporting per month

Global tracking of

200+ ADVERSARIES

The solution

ESET THREAT INTELLIGENCE APT REPORTS

ESET APT Reports give your team **deep, contextualized insights** into the operations of **nation-state and cybercrime groups**. They go beyond indicators to reveal TTPs, infrastructure and likely attribution. This helps you prioritize defenses, detect stealthy campaigns sooner and reduce risk to critical assets. All powered by ESET's global telemetry, deep reverse engineering and regional expertise.

WHAT'S INCLUDED

- Detailed PDF reports
- IoCs, YARA rules, MITRE ATT&CK® mapping
- Analyst briefing sessions

KEY BENEFITS

Strategic awareness

Understand the motivations, targets and evolution of APT groups relevant to your organization.

Operational readiness

Use actionable intelligence to strengthen defenses and inform incident response playbooks.

Exclusive insights

Access nonpublic intelligence from ESET's proprietary research and telemetry, with deep coverage of threat activity from China, North Korea, Russia and Iran.

What's in ESET Threat Intelligence APT Reports

CATEGORY	APT Reports	APT Reports Advanced	APT Reports Ultimate
Bi-weekly Activity Summary: Recent activity of all covered APT Groups	✓	✓	✓
Threat Analysis Reports: Customized or regular technical analysis of prevalent threats (~30 per year)	✓	✓	✓
Monthly Overview: Compilation with an executive overview of threats	✓	✓	✓
Monthly Digest: Index and executive summary of the month's reports and events	✓	✓	✓
Pre-access to threat reports and selected WeLiveSecurity articles	✓	✓	✓
APT IOC Feed: Full access to STIX/TAXII feed containing IOCs from the reports	✓	✓	✓
MISP Server Access: Containing all the information available in the reports	✗	✓	✓
Access to ESET LiveAI: Providing insights and summaries of available APT reports	✗	✓	✓
Analyst Access via various platforms such as MS Teams and email (four hours per month)	✗	✗	✓
