

The University of Witwaterstrand

Wits University, deeply connected to Johannesburg for over a century, is recognised for academic excellence, research, innovation, and its commitment to social justice. Spread across seven campuses in Parktown and Braamfontein, it also includes a digital innovation precinct, sports complex, rural campus, Sterkfontein Caves, Pullen Farm, and the Wits Donald Gordon Medical Centre, the only private hospital owned by a university.

ESET Protect Advanced

The Customer

Renowned as one of the world's top universities, ranking among the top 1% of universities globally, Wits stands out for its excellence in health sciences, humanities, business leadership, engineering, mining research, and scientific innovation.

"ESET IS EASY TO MANAGE WITH SIMPLE LICENSING, A LIGHT SYSTEM FOOTPRINT, PROMPT TECHNICAL SUPPORT, AND REASONABLE COSTS."

Hement Gopal, Information Security Manager at Witwaterstrand University

The Challenge

Before using ESET, Hement Gopal mentioned that Wits University struggled with an unreliable EDR solution that delivered sub-par protection and left the University's environment vulnerable.

This inconsistency created gaps in their security posture, leaving them exposed to potential breaches, malware infiltration, and downtime.

The Solution

*"Our business benefits from using ESET's IT security solutions, **ESET PROTECT** and **ADVANCED**, which provide reliable endpoint protection. Compared to our previous IT security solution, the key advantages are ease of management, simple licensing, a light system footprint, prompt technical support, and excellent value for cost."*

Hement's IT department is now safe from vulnerabilities.

KEY BENEFITS

- Easy to manage daily
- Simple, transparent licensing model
- Light footprint with high performance
- Fast, reliable technical support
- Excellent value at reasonable cost
